## Experience

### Platinum Project

#### Student Binar Academy

April - Mei 2022

Create a game website using ReactJS, then convert it to a NextJS file, the UI Framework uses Material UI and for the database it uses Firebase. Users can authenticate, play rock-paper-scissor games, get scores and find out the leaderboard in a game.

### App Android Project

#### Freelance

Juli - Agustus 2021

Create an android application for ordering UMKM product that is connected to whatsapp. Using React Native and Firebase. The application has been launched and used by the district community.

## Education

### Binar Academy

November 2021 - Mei 2022
